

I. Bee Hunting II. Early Spring Hunting III. Bees Watering--How to Find Them IV. Hunting Bees from Sumac V. Hunting Bees from Buckwheat VI. Fall Hunting VII. Improved Method of Burning VIII. Facts About Line of Flight IX. Baits and Scents X. Cutting the Tree and Transferring XI. Customs and Ownership of Wild Bees XII. Benefactors and Their Inventions XIII. Bee Keeping for Profit I was born in a little valley, hemmed in by mountains running north and south on either side. It varies in width from one to three miles from the foot of one range to the other. From my home I have a clear view of these beautiful Mountains and, as these mountains and lowlands teemed with game of all kind, and being heavily timbered, made an ideal location for the home of the wild bee. From early youth I loved to lure the wild turkey, stalk the deer and line the bee to his home. Is it any wonder that after forty years of undiminished passion for sports of this kind that I can truthfully say there is scarcely a square rod of these mountains that is not indelibly impressed on my mind in connection with some of the above mentioned sports or pastimes? I will confine myself in this work to the subject of Bee Hunting, believing it to be one of the most fascinating and beneficial of pastimes.

PREFACE In the preparation of this work, it has been my aim to instruct the beginner in the art of bee hunting, rather than offer suggestions to those who have served an apprenticeship at the fascinating pastime. I do not wish to leave the impression that I think others who have made this a study do not know enough on the subject to give suggestions; far from it. But to be candid with each other, as lovers of nature and her ways should be, even though we be veterans in the business, by an exchange of ideas we can always learn something new and of value. Many books on sports of various kinds have been written, but outside of an occasional article in periodicals devoted to bee literature, but little has been written on the subject of bee hunting. Therefore, I have tried, in this volume, Bee Hunting for Pleasure and Profit, to give a work in compact form, the product of what I have learned along this line during the forty years in nature's school room. Brother, if in reading these pages you find something that will be of value to you, something that will inculcate a desire for manly pastime and make your life brighter, then my aim will have been reached. I am very truly yours, JOHN R LOCKARD.
