

Princess Najika of the White Kingdom is no pampered princess, but when her wedding night with the Red Knight leads to a terrible crime, it shatters her world, banishing her to a place ruled by a man known to be mad and cruel. With pluck and courage Naji is determined to survive, but with a queen wanting her dead, she'll need all the friends she can get. Before it's all over, she'll have to decide between listening to her heart and taking vengeance on the queen who gives stalkers a bad name. This is the epic journey of survival with a tenacious princess walking a land of medieval myth. A land where monsters and magic are rare but all too real. A land where a princess on the run accidentally steals a knight's heart, and sets things in motion which can only lead to worlds colliding. Add danger, a threat of mayhem and barely-escaped death, stir together and enjoy. -K. G. McAbee, fantasy author and winner of the Black Orchid Award Taut and engaging. -J. A.
